Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-21, drawn to a method for detection and improving of visual attention

in a patient.

II. Claims 22-30, drawn to a system for detection and improving visual attention

in a patient.

The inventions are distinct because of the following reason:

inventions can be shown to be distinct if either or both of the following can be

Inventions I and II are related as process of use and product. The

shown: (1) the process for using the product as claimed can be practiced with

another materially different product or (2) the product as claimed can be used in

a materially different process of using that product (MPEP § 806.05(h)). In the

instant case, the product as claimed can be used in a materially different

process of using that product. For example, this system could be used for any

cerebral disorder or impairment, in which a timed visual stimulus response

system would enable the diagnosis of the condition.

In the event that Invention II is elected, the following sections will apply.

Additionally, this application contains claims directed to the following patentably distinct species of the claimed Invention II: Species I drawn to Claim 28; Species II drawn to Claim 29; and Species III drawn to Claim 30.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, Invention II has one generic claim, claim 22.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3736

A telephone call was made to Paul Weissman on January 9, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made. Instead a written requirement for restriction was requested.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anuradha Roy whose telephone number is (571) 272-6169 and whose email address is anuradha.roy@uspto.gov. The examiner can normally be reached between 8:00am and 4:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on 571-272-4726.
